DETAILED ACTION

Election/Restrictions

The inventions are distinct, each from the other because of the following reasons:

1. Claims 1-7 and 9-10, drawn to a network architecture and call origination and termination methods using a radio access network, a mediation gateway, and an access gateway; where the architecture is composed of packet-switching and circuit-switching elements classified in class 370, subclass 352.
2. Claim 8, drawn to a call registration method of a packet voice call over a circuit-switched network, classified in class 370, subclass 357.
3. Because these inventions are distinct for the reasons given above and the search required for Group 1 is not required for Group 2, restriction for examination purposes as indicated is proper.
